

MORAR OUTDOOR

COMING SOON

Are you prepared to be surprised by a new flexible lighting solution? We are excited to announce that our new backlighting LED module Morar Outdoor is launching soon and we cannot wait to tell you about its fantastic product benefits. Get inspired and defy convention with Design LED Products.

Energy efficient, uniform backlighting

With our integrated optics technology, we achieved to create a compact light output solution for homogeneous backlighting with saving in running costs of power consumption.

IP67

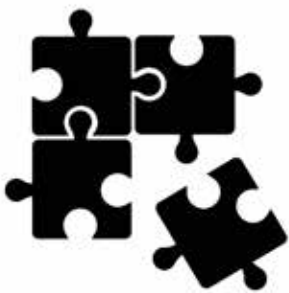

Waterproof protection

Lighting installations are protected against ingress from dust and moisture making it versatile for any interior and exterior applications.

Flexible & Ultra-thin profile

Thanks to the exceptional thin profile, the Morar Outdoor can be easily integrated into a buildings environment making it a virtually hidden light source. The flexible design inspires numerous creative applications in almost any shape imaginable.

Modular design

From discreet integrated lighting to large-scale illumination, facilitated by its modular form factor and multi cutting options, the Morar Outdoor enhances the visual impact of any architectural or retail application.

Don't see what you need? We can customise it for you!
