

'Edinburgh' has been designed to be a simple modular undershelf lighting module. It is quick to install and connect to form a minimal profile whilst maximising the light output on the surface area. Multipoint LED source eliminates product shadow and hard shadow setting a dramatic effect on merchandise. With high light colour quality and three dimming options, products can be set to look more vibrant emphasising material and texture, whilst saving energy costs at the same time. Edinburgh can be easily installed and integrated into any shop furniture offering retailers new opportunities in shop and merchandise display.

### Why Edinburgh:

- Elegant design to match premium merchandise
- 6mm profile for tight space lighting
- Integrated optics for premium product illumination with low spill onto other areas
- Modular design allows quick installation with standard mountings / fixing
- Customisation of brightness via integrated control
- Can be used as individual unit or continuous lines up to 10m
- Compatible with all 24V DC standard power supplies
- Ideal for showcases, displays, shelves and under cabinet lighting

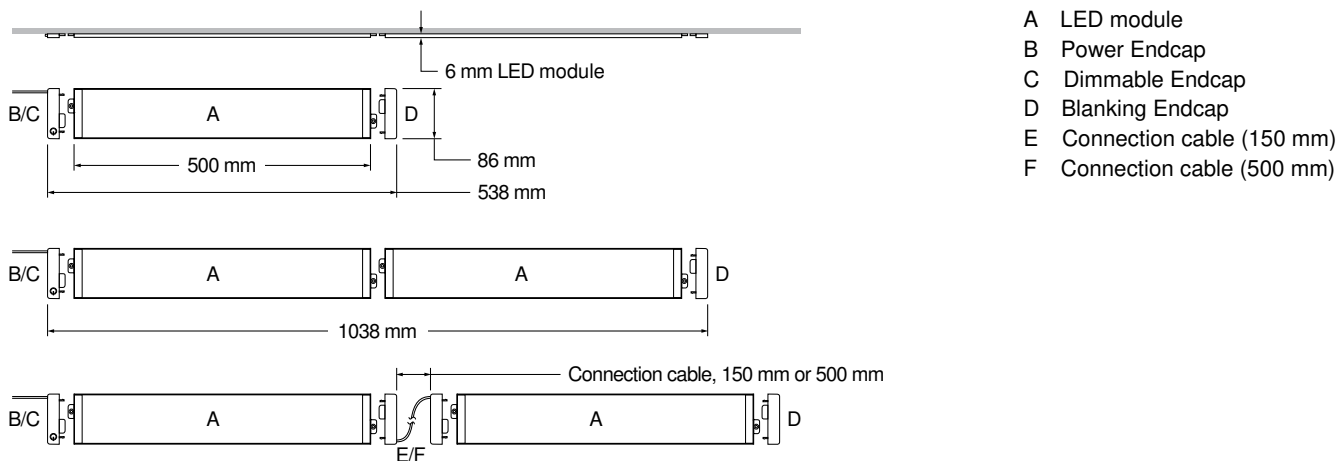

# Technical Specification

Design LED Products offers a technical consulting service to ensure light and colour quality match your project specifications.

Electrical data		Photometric data	
Power consumption	3.2 W	Luminous flux	240 lm
Input voltage	24 V DC	Module efficacy	75 lm/W
Cable required	AWG 22	CCT	3000 K, 4000 K
Max. number of serially connected modules	20 modules	CRI	85 Ra
		Lumen maintenance	L70, B50 @ +25 °C > 50,000 hrs
Certifications & Safety		Physical data	
Standards	CE	Length	500 mm
Module IP Rating	20	Width	86 mm
Energy efficiency class	A+	Module height	6 mm
Module material	PMMA (UL94-HB)	Weight	200 g
Connector material	ABS + PC (UL94-B)	Operating temperatures	-20 °C ... +50 °C

## Dimensions

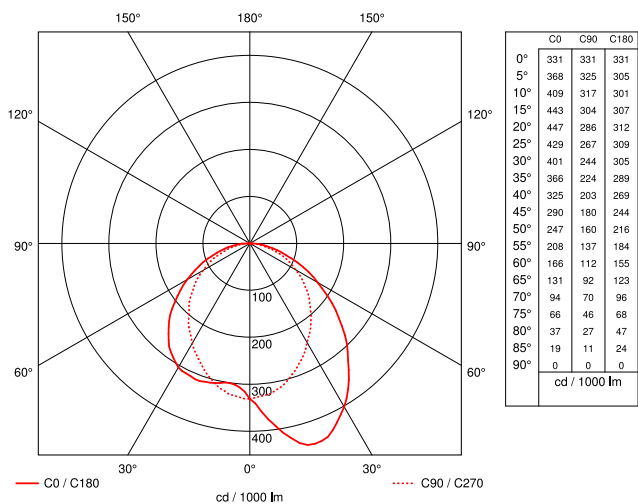

12 mm tolerance for fitting to the shelves suggested
